📣 Introducing the D-PADEIA Project 🚀

Each edition of our Newsletter will bring you fresh news on the latest developments, achievements, and valuable insights from the D-PAIDEIA project. So share it with your contacts.

The D-PAIDEA team

Welcome to the D-PAIDEIA project!

Funded by the Erasmus+ Programme

The project consortium is composed by 5 partners from 4 different countries.

The Challenges:

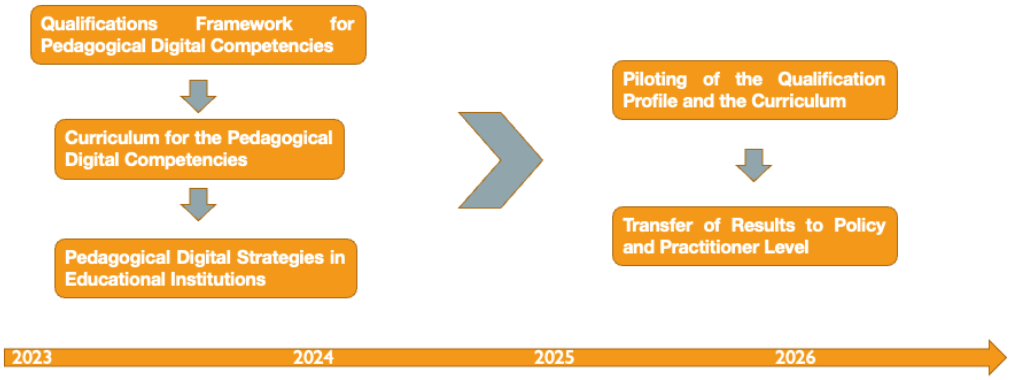
- Covid-19 forced educational institutions into digital teaching, revealing overlooked challenges.
- Educators needed to master digital tools and consider social/emotional aspects of tech-based learning.

Our Objectives:

- The project addresses this by updating the DigCompEdu qualifications framework, incorporating lessons from the pandemic experience and developing a curriculum for training teachers and practitioners across all levels.
- It also aims to support institutions in crafting cohesive, pedagogical digital strategies, focusing on high-quality and inclusive education, especially for learners in disadvantaged environments.

You can visit our new Website to know more.

Our timetable:



Our project update and what to expect going forward:

During the first year of the project, the consortium focused mainly on **Work Package 2 (WP2) - Develop a Qualifications Framework for Pedagogical Digital Competencies based on DigCompEdu**, led by the University of Florence with the collaboration of the consortium.

With this work we were able to suggest improvements to the DigCompEdu framework by **integrating three new elements in the "Professional engagement" dimension and adding a new section in the area of teachers' pedagogical competences, named "Socio-emotional and relational skills".** You can know more about this process here.

In the next steps, the team working on **Work Package 3 (WP3) - Development of a Curriculum for the Pedagogical Digital Competencies,** lead by UCLL, will create a professionalization process for this newly developed DigCompEdu model. The intention is to focus on the new competencies. You can know more about the tasks here.

The image below illustrates the additional components proposed by D-Paideia

for DigCompEdu. For more information and next steps please visit our website at www.d-paideia.eu.
